Profile Summary

Motivated and passionate Software Developer with experience in building modern web and mobile applications. Skilled in full-stack development, automation, and system integration. Known for adaptability, teamwork, and problem-solving. I am eager to keep improving my skills, explore innovative technologies, and contribute to the creation of meaningful software solutions.

Experience

Frontend & Mobile App Developer — KM NET, Acarigua, Venezuela (Aug 2023 – Sep 2025)

- Developed mobile and desktop applications using Flutter.
- Built a POS sales system for managing sales and products in retail environments.
- Created a network components tracking app integrating Google Maps for fiber optic management.
- Designed for internal use only, without client registration features.
- Collaborated with team members to optimize app performance.

Fullstack Developer (Odoo ERP) — CorpoEureka, Acarigua, Venezuela (Jul 2022 – Jul 2023)

- Developed modules and submodules for Odoo ERP (Products, Sales, Purchases, Invoicing).
- Supported development team with custom addons, functions, and data migrations.
- Improved workflow automation and system integration across departments.

Education

Bachelor's Degree in Computer Engineering: U.P.T.P JJ Montilla, Acarigua, Venezuela (May 2017 – May 2022)

Additional Training: Flask 3 with Python 3 + Vue & Bootstrap 4 Integration (Udemy Course)

Technical Skills

Frontend & UI: HTML, CSS, JavaScript, TypeScript, Tailwind, Flutter, Next.js

Backend & APIs: Python (Flask), Express.js, Node.js

Databases: PostgreSQL, MySQL, MongoDB, Supabase, Firebase

Dev Tools & Others: Git, Google Play Console, AI Gemini Integration, Chatbot AI, Odoo ERP, Stripe API

Featured Projects

POS Sales System: A desktop and mobile application built with Flutter for small and medium-sized businesses. Includes product and sales management and inventory control.

Network Components Tracker-App: A Google Maps-based mobile app for managing fiber optic network components and tracking service areas.

Odoo ERP Custom Modules: Developed modules for Odoo ERP to enhance inventory, purchase, and invoicing workflows.

Personal Projects

Gemini AI Chatbot (Flutter + SQLite): Built a chatbot app using Gemini AI API with local chat history and conversation tracking.

Crunchyroll Clone App: Developed a full Crunchyroll clone app replicating modern streaming UI and navigation features.

Stripe Payment App: Flutter app with Stripe integration for online payments and transaction management.

Raffle Web App: Full-stack raffle management web app using Next.js, MongoDB, and Supabase, deployed in production for a client.

Languages

Haitian Creole (Native), Spanish (Fluent), English (Intermediate-Advanced), French

Personal Attributes

Creative | Detail-oriented | Team Player | Self-learner | Passionate about innovation
